Definition of a Pesticide Illness

A pesticide illness case is a patient who is or may be suffering from pesticide poisoning or any disease or condition caused by a pesticide. The term **pesticide** includes any product intended to repel, kill, prevent, destroy, control, or mitigate any pest. Pesticides include insecticides, herbicides, plant growth regulators, rodenticides or other vertebrate control agents, repellents, dessicants, fungicides, miticides, disinfectants, sterilants, and sanitizers. Spray adjuvants are pesticides under California law.

Physicians are required to report known or suspected pesticide-related illness to the **local health officer** within 24 hours (Health and Safety Code §105200). Failure to report is a citable offense and subject to civil penalty (\$250).

The **local health officer** is required to immediately notify the **county agricultural commissioner** and to file the pesticide-illness report with the following **state agencies** within 7 calendar days:

Medical Cost Reimbursements from Pesticide Drift Episodes

Food and Agricultural Code §12997.5 requires that persons responsible for pesticide drift, which causes acute pesticide illness or injury in a non-occupational setting that requires emergency medical transport or treatment, be liable to the individual harmed or to the medical provider for the immediate costs of uncompensated medical care. The acute pesticide illness or injury must result from a pesticide use violation where the pesticide was used for agricultural commodities.
